MRS of Myocardial and Hepatic Triglyceride in Human Health and Disease

Lidia S. Szczepaniak Ph.D.
University of Texas, Southwestern Medical Center at Dallas, TX
April 24, 2009

1. Specifics of localized spectroscopy in moving organs
   a. Respiratory motion
   b. Respiratory and cardiac motion
   c. Available technical options

2. Experimental setup and specifics of hepatic MRS protocols
   a. Coils
   b. Patient position
   c. Parameters
   d. Data processing

3. Clinical applications of hepatic MRS

4. Experimental setup and details of myocardial MRS protocols
   a. Coils
   b. Patient position
   c. Parameters
   d. Data processing

5. Clinical applications of myocardial MRS

6. Benefits and pitfalls of clinical MRS
