Neonatal CNS Ischemia: Radiologic Perspective

Target Audience

Students, scientists, physicists, engineers, and clinicians interested in neonatal brain injury.

Outcome/Objectives

“What will learners be able to do differently because of your information?”

Purpose

“What problem are you addressing?” “How did you determine the problem?” or “Why was this study/research performed?”

Methods

“How did you develop your solution?” or “How has this problem been studied?”

Results

“Examples of how this issue has been addressed” or “Principal data and analysis”

Discussion

“Why does this issue commonly exist?” or “What is the interpretation of the data?”

Conclusion

“What is the relevance to clinical practice or future research?”
